EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Edmond A. DeFrank (Reg. No. 37,814) on March 29, 2006.

3. The application has been amended as follows:

1. (Currently Amended) A method for providing an automated login for a user connecting to a server, wherein the server comprises a first server of a plurality of servers that are connected via a computer network, the method comprising steps of:

- receiving a connection to the user via a client data terminal;
- accessing the first server by the user after being authenticated;
- selecting from the first server a computer input mark to a second server and assigning a first identifier and underlying second identifier associated with the first server of the computer input mark;

accessing the services of the second server from the user and based on the received [identifier] identifiers if both identifiers are authenticated; and

authenticating, without the use of cookie, the user and the first server based on the first and second identifiers and allowing access to the second server by linking the user to the second server through the first server and without requesting a cookie from the client if both identifiers are authenticated to eliminate the need for the user to provide separate login information and to eliminate the use of cookies when connecting to the second server via the input mark.

10. (Currently Amended) A method for providing an automated login for a user logging onto a host web site, the method comprising steps of:

receiving a connection to a user via an affiliated web site;

accessing [the] a first server by the user after being authenticated;

selecting from [the] a host web site a computer input mark having a hyperlink to a second web site and assigning a personal identifier and an underlying provider identifier associated with the host web site of the computer input mark;

allowing the user access to the host web site; and

accessing the services of [the] a second server by linking [a] the user to [a] the second server through the first server and based on the received [identifier] identifiers if both identifiers are authenticated wherein the need for the user to provide separate login information and the use of a cookie between the first server and second server is

eliminated when connecting to the second web site via the hyperlink of the input mark [and without the use of a cookie].

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Prior art of record *Sampson et al.* (US 6,339,423 B1), *Goldberg et al.* (US 5,823,879 A), or any combination thereof, does not disclose, teach, or suggest "authenticating, without the use of a cookie, the user and the first server based on the first and second identifiers and allowing access to the second server by linking the user to the second server through the first server", "wherein the need for the user to provide separate login information and the use of a cookie between the first server and second server is eliminated when connecting to the second web site via the hyperlink of the input mark", and "both identifiers are authenticated to eliminate the need for the user to provide separate login information when connecting to the second connection via the hyperlink of the input mark and to eliminate the use of cookies during authentication and connection" as recited in independent claims 1, 10, and 15, respectively.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
